

Solution 1: Text-align center

This uses text-align: center on a wrapper and inline-block on the content.

Solution 2: Flexbox centering

This uses flexbox with justify-content: center.

Solution 3: CSS Grid centering

This uses CSS Grid with place-items: center.

Solution 5: Fixed width with margin auto

This uses a fixed width instead of max-width with margin auto.

Solution 4: Transform centering

This uses absolute positioning with transform: translateX(-50%).
